POSTAL CODE PRODUCTS

USA ZIP+4

19-Q2

AND released the ZIP+4 Postal Code Boundaries as first company in the market to present this product. The data represents a boundary file that defines each unique ZIP+4 code area in the United States. AND has expanded the ZIP+4 code into boundaries and polygons, adding a new level of utility and granularity to ZIP code data for marketing, planning and analysis. The data is updated regularly and offers an unique accurate boundary providing.

KEY FEATURES

USA ZIP+4 Postal Code, Boundaries, Centroids.

TYPICAL USE CASES

With its very refined segmentation the ZIP+4 data represents the ideal product for highly precise and at the same time anonymous geomarketing, route planning, parcel service, additional administrative level, searchability and geocoding.

DELIVERY FORMATS

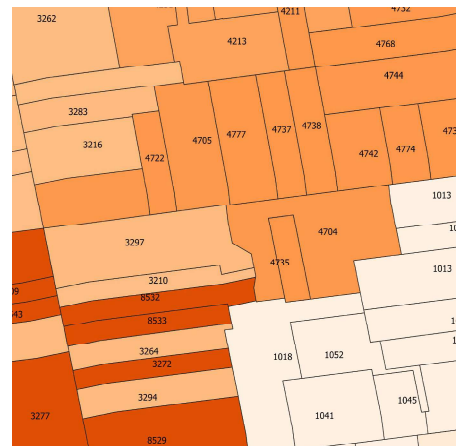

Shape (.shp/.shx/.dbf/.prj)

PROJECTION

The global projection system used in AND data is in decimal degrees (latitude and longitude) with WGS84 as datum, according to the ellipsoid model used for computations. The spatial reference id is EPSG:4326.
