

Navigation Maps

ROAD NETWORK

AND offers turn-by-turn Navigation Maps for Western Europe and North America. These detailed digital maps contain attributes like detailed addresses, access information, road types and more. This data can be seamlessly combined with AND boundaries and nodes.

KEY FEATURES

The AND data set of the Navigation Maps consists of the road network, ferries, rails, settlements, turn restrictions, signposts, points of interest, areas of interest, house number ranges and postal codes.

TYPICAL USE CASES

AND's Navigation Maps are used in the PND market, in smartphones, automotive industries and web viewers.
